

What you need to know about your diagnosis, before you have a treatment plan:

<p>Type: Endometrial cancer <i>type</i> is based on how the tumor uses a hormone called estrogen.</p>	<input type="checkbox"/> Type I (less likely to spread to other areas of the body)	<input type="checkbox"/> Type II (more likely to spread to other areas of the body)
--	---	--

<p>Grade: Endometrial cancer <i>grade</i> is based on how cancer cells look under a microscope, compared to healthy cells.</p>	<input type="checkbox"/> Grade 1 (the most similar to healthy cells, <i>usually</i> Type I)	<input type="checkbox"/> Grade 2 (<i>usually</i> Type I)	<input type="checkbox"/> Grade 3 (the least similar to healthy cells, <i>usually</i> Type II)
---	--	--	--

My surgery plan

<p>Name of the doctor performing the surgery:</p>			
--	--	--	--

<p>Type of procedure: The most common treatment for endometrial cancer is surgery that removes the uterus and ovaries. Your surgeon may also recommend removing lymph nodes in your abdomen as well. This helps to decide if you need more treatment after surgery.</p>	<input type="checkbox"/> Removal of uterus and ovaries, no planned removal of lymph nodes (Hysterectomy = removal of uterus, oophorectomy = removal of ovaries)	<input type="checkbox"/> Removal of uterus, ovaries, and lymph nodes (Hysterectomy = removal of uterus, oophorectomy = removal of ovaries, Lymphadenectomy = removal of lymph nodes)	<input type="checkbox"/> Other
---	--	---	--------------------------------

<p>How the surgery will be done:</p>	<input type="checkbox"/> Minimally invasive (laparoscopy = one or more small incisions)	<input type="checkbox"/> Abdominal (laparotomy= a larger incision in the abdomen)	<input type="checkbox"/> Vaginal (surgery is performed via a vaginal incision)
---	--	--	---

Notes and questions:
 (you may want to take notes on the goals of your treatment, and questions that you may have. It may also be helpful to bring a tape recorder to every appointment.)

My after-surgery plan:

<p>Stage:</p> <p>Endometrial cancer <i>stage</i> can only be determined with surgery. Stage helps your team what the next step of care should be.</p>	<p><input type="checkbox"/> Stage 1 (The cancer is found only in the uterus, and it has not spread to other parts of the body.)</p>	<p><input type="checkbox"/> Stage 2 (The cancer has spread from the uterus to the cervix, but not to other parts of the body.)</p>	<p><input type="checkbox"/> Stage 3 (The cancer has spread beyond the uterus and cervix, but it is still only in the pelvic area.)</p>	<p><input type="checkbox"/> Stage 4 (The cancer has spread to organs outside the pelvic area.)</p>
--	--	---	---	---

<p>Radiation after surgery: Using <i>high-doses of X-rays</i> to kill cancer cells.</p>	<p>Am I getting radiation? <input type="checkbox"/> Yes <input type="checkbox"/> No</p>	<p>Use ECANA's "Radiation: Know Before You Go"</p>
---	---	--

<p>Chemotherapy after surgery: Using <i>drugs</i> to kill cancer cells.</p>	<p>Am I getting chemotherapy? <input type="checkbox"/> Yes <input type="checkbox"/> No</p>	<p>Use ECANA's "Chemo: Know Before You Go"</p>
---	--	--

Your care team

My information:

Medical record #:

Emergency contact name and phone #:

Pharmacy #:

Pharmacy Address:

Remember: you are the captain of your care team! You always have the right to ask questions & get second opinions.
